

PD4045 or PD4060 setting to LifePO4 batteries Single stage 14.6 VDC. 14.4VDC after 01/01/2023

PD4045 or 4060

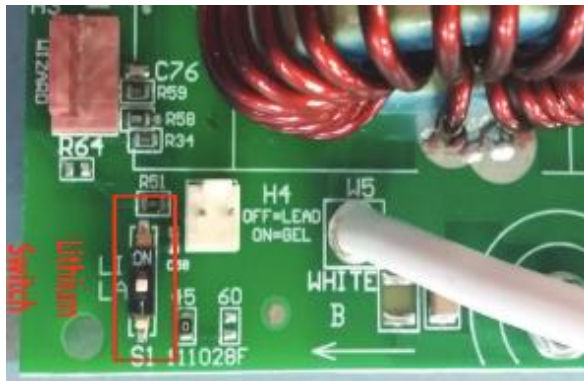

Turn off the AC power to the PD4000 ..

Open the door and remove the single screw next to the fuses.

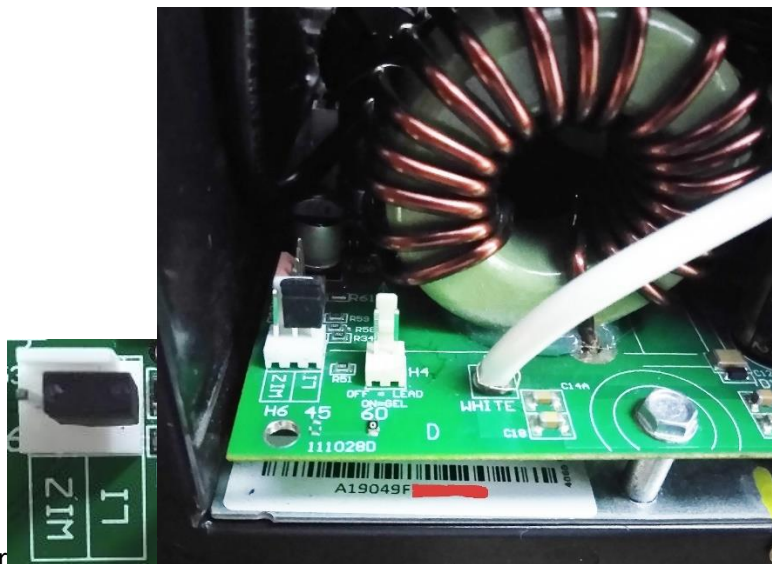

Using a flat blade screwdriver release the cover by inserting and twisting at the openings on the side of the bezel.

Then find the converter board switch or jumper .

The switch would be on the converter board made after Feb 2020.

Prior to 2020 there may be a jumper that can be moved and set it to Li

Jumper

Lift it off the 2 pins and replace it over the center pin and the one on the LI side

[If you have neither then any PD4045CSV or PD4060CSV will have the switch .](#)

PD4045LICSV had a factory set jumper offered for a short time.

.
